## Smart

A smart economy is one that uses technology and innovation to drive growth. This means investing in education and research, and supporting businesses that are developing new technologies.

A smart economy also means investing in infrastructure. This includes things like roads, bridges, and broadband internet. These investments will help to make our economy more efficient and productive.

## **Fair**

A fair economy is one that provides opportunity for all. This means ensuring that everyone has access to quality education, healthcare, and housing.

A fair economy also means reducing economic inequality. This means raising the minimum wage, expanding access to affordable housing, and providing tax breaks for working families.

## **Sustainable**

A sustainable economy is one that protects the environment and ensures that our natural resources are available for future generations.

A sustainable economy means investing in clean energy and renewable energy.

A sustainable economy also means reducing our consumption of resources and waste.

## **Building the New American Economy**

Building the new American economy will not be easy. It will require significant investment and a long-term commitment. But it is an investment that we must make. The future of our economy depends on it.

Here are some specific steps that we can take to build a new American economy:

- Invest in education and research
- Support businesses that are developing new technologies

- Invest in infrastructure
- Raise the minimum wage
- Expand access to affordable housing
- Provide tax breaks for working families
- Invest in clean energy and renewable energy
- Reduce our consumption of resources and waste

These are just a few of the steps that we can take to build a new American economy. By working together, we can create an economy that is smart, fair, and sustainable.
