## What is a Fat Quarter?

A fat quarter is a piece of fabric that measures 18" x 22". It's a great size for making small quilts, table runners, and other small projects. Fat quarters are available in a wide variety of colors and patterns, so you're sure to find the perfect ones for your project.

## Getting Started with Two Fat Quarters

The easiest way to get started with quilting with two fat quarters is to make a simple quilt block. A quilt block is a small, square unit that can be sewn

together to create a larger quilt. There are many different quilt block patterns available, so you can choose one that you like and get started.

Once you have made a few quilt blocks, you can sew them together to create a quilt top. The quilt top is the front of the quilt, and it's what you will see when the quilt is finished. You can quilt the quilt top by hand or by machine, and you can use a variety of different quilting stitches to create a unique look.

Once the quilt top is finished, you will need to add a backing and batting. The backing is the fabric that will be on the back of the quilt, and the batting is the material that will give the quilt its warmth and loft. You can find both backing and batting at your local fabric store.

Once you have added the backing and batting, you will need to bind the quilt. Binding is the process of sewing a strip of fabric around the edges of the quilt to finish it off. You can find binding at your local fabric store, or you can make your own.

## **Tips for Quilting with Two Fat Quarters**

\* \*\*Use a variety of colors and patterns.\*\* This will give your quilt a more interesting and dynamic look. \* \*\*Experiment with different quilt block patterns.\*\* There are many different quilt block patterns available, so don't be afraid to try a few different ones until you find one that you like. \* \*\*Don't be afraid to make mistakes.\*\* Quilting is a learning process, and everyone makes mistakes along the way.
