The Choral Challenge was developed by Dr. Sandra Snow, a music educator with over 30 years of experience. Dr. Snow has seen firsthand the power of music to transform students' lives, and she believes that the Choral Challenge can help students develop the skills they need to succeed in school and beyond.

The Choral Challenge is a four-year program that is designed to help students develop their critical thinking, problem-solving, and creativity skills. The program is divided into four levels, each of which focuses on a different set of skills. In the first level, students learn the basics of choral singing, including how to read music, how to sing in tune, and how to blend their voices with others. In the second level, students begin to develop their critical thinking skills by learning how to analyze music and how to solve musical problems. In the third level, students learn how to be creative by composing and arranging their own music. In the fourth level, students put their skills to the test by performing in a variety of settings.

The Choral Challenge has been shown to have a positive impact on students' academic achievement. A study conducted by the University of California, Davis found that students who participated in the Choral Challenge for two years showed significant gains in their reading and math scores. The study also found that students who participated in the Choral Challenge were more likely to graduate from high school and attend college.

The Choral Challenge is a valuable program that can help students develop the skills they need to succeed in school and beyond. The program is fun and engaging, and it provides students with a unique opportunity to learn about music and develop their critical thinking, problem-solving, and creativity skills.
